

Vapor Workgroup
Meeting #4, August 5, 2010
1:00 – 4:00 pm, Ecology HQ

Agenda

Welcome

Announcements

- Summary of state vapor intrusion requirements
- Other?

Status report

- Recap of where Ecology is in terms of rule issues, discussions, and drafting.

Review and Discuss Draft Rule Language

- At the last meeting, Ecology distributed draft rule language that reflects concepts in the draft Ecology VI guidance document and discussions with the Vapor Workgroup. We have received a lot of great comments from workgroup members. Pete is reviewing those comments. Today we would like to work through the draft language. We hope to get additional input and discuss ways of addressing the questions/issues that people have raised.

Potential Additional Vapor Rule Issues

- Criteria for Interim actions
- Using institutional controls
- Ambient air background

Next Steps

Topics for further discussion

- What are the components of a decision-making approach that is based on multiple lines of evidence (that is, how do I justify a NFA determination?). This would also include defining how one takes into account background concentrations related to indoor sources of contaminants.
- Screening levels for petroleum contaminants.
- Decision-making in other common situations (such as shopping mall scenario)
- Revisions and issues related to EPA inhalation risk assessment guidance (revisions to -708 and -750)
- Other???

Schedulable and next meeting date(s)

- How many more meetings
- Goals and expectations
